

Feature Report

Gaming UI Enhancements (Cursor + Background Music)

Scope

- Custom **gun cursor**
 - **Background MI6-style game music**
 - Music plays **after first user interaction** (browser-safe)
 - Music runs in **loop, low volume**
 - Optional **mute/unmute button**
 - No backend changes
-

PROJECT STRUCTURE (IMPORTANT)

Actual structure (

```
src/main/webapp/
├── assets/
│   ├── gun.cur
│   └── mi6-theme.mp3
├── ProfileLayoutDivPercentage.html  📌 MAIN FILE
├── index.html
├── homeGoogle.html
└── other .html files
```

FEATURE 1 — Custom Cursor (Gun Cursor)

STEP 1 — Open the correct file

📌 Open

src/main/webapp/ProfileLayoutDivPercentage.html

STEP 2 — Add cursor CSS (ONLY HERE)

- 📌 Find **<style>** block
- 📌 Scroll to the **VERY BOTTOM** of **<style>**, just before **</style>**

✓ PASTE THIS

```
/* =====  
CUSTOM GAMING CURSOR  
===== */  
  
html, body {  
  cursor: url("/portal/assets/gun.cur") 16 16, auto;  
}  
  
button,  
a,  
input,  
textarea {  
  cursor: url("/portal/assets/gun.cur") 16 16, pointer;  
}
```

✓ Done

🟢 FEATURE 2 — Background Game Music

Why earlier attempts failed

1. Browser **blocks autoplay**
2. Wrong path (assets vs assests)
3. Audio must start **after user interaction**

We fix all three.

STEP 3 — Add <audio> tag

- 📌 Scroll to the **BOTTOM** of <body>
- 📌 Place this **just before** </body>

✓ PASTE THIS

```
<!-- =====  
BACKGROUND GAME MUSIC  
===== -->  
<audio id="bgMusic" loop preload="auto">  
  <source src="/portal/assets/mi6-theme.mp3" type="audio/mpeg">  
</audio>
```

STEP 4 — Add music start logic (Browser-safe)

- 📌 Just **BELOW** the `<audio>` tag
- 📌 Still **before** `</body>`

✅ PASTE THIS

```
<script>
  function startGameMusic() {
    const music = document.getElementById("bgMusic");
    if (!music) return;

    music.volume = 0.25; // Low volume
    music.play().catch(err => {
      console.log("Music blocked until user interaction:", err);
    });
  }

  // First user interaction unlocks audio
  document.addEventListener("click", function initMusicOnce() {
    startGameMusic();
    document.removeEventListener("click", initMusicOnce);
  });
</script>
```

- ✅ This is **mandatory**
- ✅ Works in Chrome, Edge, Safari, Firefox

🟢 FEATURE 3 — Mute / Unmute Button (Recommended)

STEP 5 — Add toggle button

- 📌 Scroll to **TOP** of `<body>`, immediately after `<body>`

✅ PASTE THIS

```
<!-- 🎧 Music Toggle Button -->
<button id="musicToggleBtn"
  onclick="
    const m = document.getElementById('bgMusic');
    m.muted = !m.muted;
    this.textContent = m.muted ? '🔊' : '🔇';
  "
  style="
    position: fixed;
    top: 14px;
    right: 16px;
```

```
z-index: 99999;  
background: black;  
color: #00ff66;  
border: 1px solid #00ff66;  
border-radius: 20px;  
padding: 6px 12px;  
cursor: pointer;  
">  
  
</button>
```

Where to get `.cur` files (SAFE & FREE)

 **Best site**

 <https://www.cursor.cc/>

Steps:

1. Search: gun, pistol, or crosshair
2. Select **32×32**
3. Set hotspot correctly
4. **Download as `.cur`**

Rename file to:

`gun.cur`

BACKGROUND MUSIC
