

Feature Report

PART 1 — GUNSHOT SOUND ON CLICK

STEP 1 — ADD AUDIO TAG (HTML)

Where exactly?

Paste **just before closing** `</body>`

```
<!-- ===== Gunshot Click Sound ===== -->
<audio id="gunshotSound" preload="auto">
  <source src="assets/sounds/gunshot.mp3" type="audio/mpeg">
</audio>
```

Folder structure must exist:

```
portal/
├── assets/
│   └── gunshot.mp3
```

Use a **short gunshot** ($\leq 300\text{ms}$), royalty-free.

STEP 2 — ADD JAVASCRIPT (VERY IMPORTANT)

Where exactly?

Inside the **existing** `<script>` block,

 **inside** `$(document).ready(function(){ ... })`

 **paste at the BOTTOM**, just before `});`

PASTE THIS (DO NOT MODIFY)

```
/* ===== Gunshot Click Sound Logic ===== */

const gunshot = document.getElementById("gunshotSound");
if (gunshot) {
  gunshot.volume = 0.15; // VERY LOW volume
}
```

```
let soundUnlocked = false;

// Unlock audio on first user interaction
document.addEventListener("click", function unlockSoundOnce() {
  if (gunshot) {
    gunshot.play().then(() => {
      gunshot.pause();
      gunshot.currentTime = 0;
      soundUnlocked = true;
    }).catch(() => {});
  }
  document.removeEventListener("click", unlockSoundOnce);
});

// Play sound on allowed clicks
$(document).on("click", "button, .read-btn, .mainMenuButton", function () {
  if (!soundUnlocked || !gunshot) return;
  gunshot.currentTime = 0;
  gunshot.play().catch(() => {});
});
```

✓ What this does

- Fixes **autoplay restriction**
 - Plays sound **only on allowed elements**
 - Keeps volume subtle
 - No repeat overlap
 - Safe for production
-

🎯 PART 2 — CROSSHAIR HOVER EFFECT (CSS ONLY)(Optional)

STEP 3 — ADD CURSOR IMAGE

📌 File:

portal/assets/cursors/crosshair.png

Rules

- 32×32 px
- Transparent PNG

- Centered crosshair
-

STEP 4 — ADD CSS

Where exactly?

Inside the **main <style> block**,

 **paste at the VERY BOTTOM**, just before `</style>`

PASTE THIS (DO NOT DELETE EXISTING CSS)

```
/* ===== Crosshair Cursor ===== */

html, body {
  cursor: url("assets/cursors/crosshair.png") 16 16, auto;
}

/* Hover pulse effect */
button:hover,
.read-btn:hover,
.mainMenuButton:hover,
.topic-card:hover {
  cursor: url("assets/cursors/crosshair.png") 16 16, pointer;
  box-shadow: 0 0 12px rgba(0,255,102,0.6);
  transform: scale(1.02);
  transition: all 0.15s ease;
}
```

What this does

- Crosshair cursor everywhere
 - Slight scale on hover
 - Green glow pulse
 - No JS
 - No animation fatigue
-

HOW TO VERIFY (30 seconds)

1. Reload page
2. Click once anywhere (unlocks audio)

3. Hover a button → glow + scale
 4. Click button → **soft gunshot**
 5. No console errors
 6. No lag
-
